

Get out your homework and have it ready to check. Target Check on inequalities on Thursday. Warm Up on the problems below.

### Classwork - Writing Inequalities

Warm Up: Solve the following Inequalities.

A)  $2x - 8 > 20$

$$\begin{array}{r} +9 \quad +8 \\ \hline 2x > 28 \\ \frac{2x}{2} > \frac{28}{2} \\ x > 14 \end{array}$$

B)  $\frac{2}{3}x + 7 \leq -1$

$$\begin{array}{r} -7 \quad -7 \\ \hline 3 \cdot \frac{2x}{3} \leq -8 \\ \frac{2x}{2} \leq \frac{-24}{2} \\ x \leq -12 \end{array}$$

C)  $-5x + 4 \leq 19$

$$\begin{array}{r} -4 \quad -4 \\ \hline -5x \leq 15 \\ \frac{-5x}{-5} \leq \frac{15}{-5} \\ x \geq -3 \end{array}$$

Solve and graph the following inequalities. Remember, when multiplying or dividing by a negative number to must flip the inequality symbol. SHOW WORK

A)  $8x - 12 \leq 20$

$$\begin{array}{r} +12 \quad +12 \\ \hline 8x \leq 32 \\ \frac{8x}{8} \leq \frac{32}{8} \\ x \leq 4 \end{array}$$

B)  $\frac{x}{4} + 7 > -6$

$$\begin{array}{r} -7 \quad -7 \\ \hline 4 - \frac{x}{4} > -13 - 4 \\ x > -52 \end{array}$$

C)  $-3.25x + 10 < -29$

$$\begin{array}{r} -10 \quad -10 \\ \hline -3.25x < -39 \\ \frac{-3.25x}{-3.25} < \frac{-39}{-3.25} \\ x > 12 \end{array}$$

D)  $\frac{2}{3}x - 6 \geq 4$

$$\begin{array}{r} +6 \quad +6 \\ \hline 3 \cdot \frac{2x}{3} \geq 10 + 6 \\ \frac{2x}{2} \geq \frac{30}{2} \\ x \geq 15 \end{array}$$

$$E) 31 \geq 5x - 9$$

$$\begin{array}{r} +9 \quad +9 \\ \hline \end{array}$$

$$\frac{40}{5} \geq \frac{5x}{5}$$

$$8 \geq x \text{ OR } x \leq 8$$

$$F) -\frac{1}{3}x + 11 \leq 9$$

$$\begin{array}{r} -11 \quad -11 \\ \hline \end{array}$$
$$3 \cdot \frac{-1x}{3} \leq -2 \cdot 3$$

$$\frac{-1x}{-1} \leq \frac{-6}{-1}$$

$$x \geq 6$$

### Inequality Signs

$>$   $\rightarrow$  Greater Than     $<$   $\rightarrow$  Less Than     $\geq$   $\rightarrow$  Greater Than or Equal To     $\leq$   $\rightarrow$  Less Than or Equal to

Open Circle is  $<$  or  $>$   
(Value IS NOT included)

Closed Circle is  $\leq$  or  $\geq$   
(Value IS included)

1) Write an inequality to represent the situation. Then graph the inequality.

A) To ride an amusement park ride, you must be 52 inches tall or taller.

$h = \text{height}$        $h \geq 52$

B) A restaurant can hold at most 45 people.

$P = \text{People}$        $P \leq 45$

~~C) In most states, you must be at least 16 years old to drive a motor vehicle.~~

~~$t = \text{tickets}$        $t < 150$~~

D) To run for the President of the United States, you must be at least 35 years old.

$a = \text{age}$        $a \geq 35$

E) In the game of football, a team needs to gain at least 10 yards for a first down.

$y = \text{yards}$        $y \geq 10$

2) Write an inequality to represent the situation. Then solve and graph the inequality.

A) A bus holds at most 47 passengers. There are already 29 passengers seated on the bus. How many more passengers can be seated on the bus? Write an inequality and solve. Then graph it.

Define Variable:  $p = \text{passengers}$

Inequality

$$p + 29 \leq 47$$
$$\begin{array}{r} -29 \\ \hline \end{array}$$

$$p \leq 18 \text{ passengers}$$

B) It cost Sophia \$72 to make wind chimes. How many wind chimes can she sell at \$12 apiece to make a profit? Write an inequality and solve. Then graph it.

Define Variable:  $w = \text{wind chimes}$

Inequality

$$12w > 72$$
$$\begin{array}{r} \hline 12 \end{array}$$

$$w > 6 \text{ wind chimes}$$

C) Jude wants to spend \$55 from his savings account on a video game. He wants to have at least \$150 left in his account after he purchases the video game. How much money would Jimmy need in his savings account? Write an inequality and solve. Then graph it.

Define Variable:  $m$  = money in account

Inequality

$$\begin{array}{r} m - 55 \geq 150 \\ + 55 \qquad + 55 \end{array}$$

$$m \geq \$205$$

D) Mark is driving to Florida at 65 miles per hour. The most he is willing to drive in one day is 585 miles. How many hours could he possibly drive? Write an inequality and solve. Then graph it.

Define Variable:  $h$  = hours

Inequality

$$\begin{array}{r} 65h \leq 585 \\ \hline 65 \qquad 65 \end{array}$$

$$h \leq 9 \text{ hours}$$

E) Jacius has drunk 2 glasses of water today so far. His goal is to drink ~~at least 8 glasses or more each day~~ <sup>more than</sup> 8 glasses each day. How many glasses does he need to drink to reach his goals? Write an inequality and solve. Then graph it.

Define Variable:  $g$  = glasses

Inequality

$$g + 2 > 8$$
$$\begin{array}{r} -2 \\ -2 \end{array}$$

---

$g > 6$  glasses
